

Additives and Conversion

Additives

Our cross-linked foams are fully processed in-house using cutting-edge technology.

PA	Small Cells
PS	Soft Material
PB	Large Cells
PM	Extra Rigid
FR	Fire Resistant
UV	Ultraviolet Resistant
AS	Antistatic
EV	Copolymer EVA
GM	Hard Foam
M	Metallocene
CD/SD	Conductive/Static Dissipative
Colors	Colors' option upon specifications

Conversion

Our anti-clogging grades of foam keep conversions simple, and the process quick and clean.

- A variety of textures
- A variety of embossing
- Die Cut
- Water Jet
- CNC
- Thermoforming
- Lamination options
 - Aluminum foil
 - Metalized film
 - Anti-slip film
 - Various materials, such as: soft PVC, fabrics, raffia, film etc.
- PSA - Pressure Sensitive Adhesive
 - Acrylic
 - Hotmelt
