Company Profile

Palziv is widely recognized for its cross-linked, closed cell polyethylene foams. For over 30 years, Palziv has been providing R&D and production solutions with complete logistics support & customer service to markets in Israel, Europe and North America.

Palziv's headquarters are situated in Israel, with the following sites worldwide:

Production – Israel, Canada, U.S.A. and Romania

Distribution and Logistics Centers – Ohio and North Carolina, U.S.A. and Birmingham, UK

Direct Sales Points–Switzerland, Germany and Italy

Palziv's state-of-the-art expertise enables us to supply the market with closed-cell polyethylene foam in both rolls and blocks and as semi-processed customized products in compliance with customer need.

Palziv cross-linked foam products are applied in a diverse range of industries:

- **Construction, Insulation & Air-conditioning**
- **Packaging**
- **Automotive , Seals, Gaskets & Joints**
- **Tunnel Lining and Tram Rail Insulation**
- **Flotation Systems**
- **Orthopedics & Medical**
- **Car-Wash Brushes**
- **Lifestyle: Sports, Camping, Toys, Hobbies & DIY**

Palziv respects the environment by recycling its material, offering a new material called Sirex for use in drainage, green roofs and playground cushioning.

Palziv tailor-made solutions aim to meet your highest expectations.
